

*Handboek* : **KMS-002**  
*Rev/Datum* : E/05-02-2024

*Titel* : **Quality Policy**

• **Policy statement: "Quality, Health & Safety, and Environment"**

Maron Projects BV and Bluewing BV are customer focused, design and installation companies..

Our policy is focused on assuring the continuity and profits of the enterprise. We want to achieve this through a safe and environmentally responsible way of performing the work \*, including the agreed after care with a good value for money, which corresponds to the (legal) requirements and legitimate expectations of our client.

The project-based and safe approach, the reactions of our customers and the critical assessment of our own, makes that our products and services are safe and attractive to clients and mutual trust in the cooperation.

We work with a safety and quality (VKM) system that meets the ISO 9001 and EN ISO 3834-2 requirements for assuring and regularly reviewing the goals set by us.

Our policy is to maintain and continuously improve the effectiveness of the VKM system. The concern for safety, health, labor and welfare of employees and third parties is a high priority within the organization and is achieved by satisfying the (OSH) Act and regulations and the prevention of personal, property and environmental damage.

The processes and products are regularly tested on a basis of product and process indicators, as set out in the company annual plan, and/or the management assessment report.

The policy is reviewed every three years and made known to all employees by including it in this handbook, through meetings and communications, and also by publishing partly in the "House Rules & Safety" of Maron Projects BV and Bluewing BV

\* The work may include: equipment, vessels, structures, piping and transportation.  
Objectives

The (HSEQ) objectives are detailed in the company's annual plan and will be critically reviewed and adjusted as needed, by the Director on the basis of the policy. Annually, the (HSEQ) objectives analyzed in a management review (MR) by the Director and staff.

The status and the realization of the (HSEQ) objectives will be included in a management assessment report (MR report).
